 Other (specify): _____

Describe in detail the project you are requesting the ARB to approve:

The ARB considers and approves requests of homeowners based upon the HOA construction guidelines as stated in the Design Standards and Construction Guidelines. It is the responsibility of the homeowner to contact applicable regulatory agencies and verify that the proposed work conforms to regulatory standards. The Homeowner is responsible for identifying and obtaining all Federal, State and/or County permits that may be required and to provide signed copies of the permits to the ARB prior to starting any work.

If a conflict occurs between the ARB approval and any regulatory agency, the government body takes precedence, and a revised ARB application must be submitted.
